	22 Mar 44		<p>At 0900 hrs, Maj. MacKensie went to visit "D" and "A" Coys. While he was away the L.O. from Bde visited TAC. The Brigadier requested two recon patrols. During the afternoon the patrols were briefed. They recon'd ground on air photos and then visited "C" Coy O.P. to recon ground as much as observation permitted. One to DAISY area forward of our "C" Coy positions another to JOHNNIE north of our "D" and "A" Coy positions. DAISY patrol brought back information of light observed in houses and some coughing. Lieut. DUNCAN who took JOHNNIE did not encounter enemy but recon'd route for future patrol activity. The R.A.P. moved into forward position this morning with its own cookhouse where guards for barrier were to be fed. The Padre came forward to TAC during afternoon and had his evening meal with "C" Coy. No H.S. our areas during day. Weather - Overcast, some light rain.</p>	<p>Σ</p>

3. LEAVE - FIREARMS

It is a serious offence for personnel on leave in BARI to carry firearms.

4. SLIT TRENCHES

Slit trenches which are no longer in use operationally should be filled in and drained where possible as they will be ideal breeding grounds for mosquitoes with consequent increase in malaria.

5. PAYBOOK - MEM PAGES I & II

- Responsibility for the safe custody of this document rests with the soldier. Reported losses of paybooks have reached serious proportions.
- All soldiers are again warned that they should be in possession of their paybook at all times.

6. DISCIPLINE - EIGHTH ARMY REST CAMP

1. Complaints have been received that personnel visiting Eighth Army Rest Camp are guilty of grave breaches of discipline in the town of BARI. The most common offences are DRUNKENNESS and being OUT OF BOUNDS IN BARRACKS.

2. Coy Comds will draw the attention of all proceeding on leave to Eighth Army Rest Camp to the following:-

- On Rest Camp will immediately return to their units any offenders, if necessary in close arrest. Disciplinary action will be taken by Unit Comd and exemplary punishments awarded.
- If there is not a considerable improvement in the present standard of behaviour, the town of BARI WILL BE PLACED OUT OF BOUNDS.
- If the foregoing steps are not successful, the Rest Camp will be closed.

## 7. LETTING

It has been brought to the attention of this Unit that Infantry personnel have been looting from ALLIED TANKS. ALL ranks must be made to understand that the avoidable loss of kit or its misappropriation is a crime and just as harmful as deliberate sabotage.

## 8. FLIES & MOSQUITOES

1. The time has now arrived when it is essential that we should take energetic measures to fight the two great dangers to health in the summer - the fly and the mosquito. If we wait to start both control measures and earnestly study these two measures are with us we will suffer heavy casualties which could have been avoided.

2. There are but few units which were not in this theatre last year and they know what to expect if they fail to take adequate precautions. A large number of officers have joined since then. For their benefit it must be pointed out that both malaria and fly-borne disease are largely preventable even when fighting is in progress, as is everything else it is all a question of the standard of unit and individual discipline. The sick wastage from this and other causes in the good units will be negligible, while in the units with poor discipline, wastage until they have learnt their lesson by bitter experience, may be anything between 50 and 100 per cent. There are many examples of this last year. In 1945 there were as many as 100 men hospitalized with malaria as with wounds. In the short Italian Campaign there were 5,000 more malaria cases than battle casualties; this was attributed to failure to carry out medical recommendations, to interest and to sickness in taking malarial prophylactics. One of 1,500 men living in a highly malarious area for operational reasons only 25 men infected in six months. This was due to good discipline and loyal co-operation of all ranks. On the other hand in certain formations a very high percentage of the men became malaria cases. In North Africa where the battalions were camped alongside each other under identical conditions, one had less than a quarter of the cases incurred by the other battalions. In mid-July in North Africa there were admitted to hospitals:-

1 1/2% Malaria cases  
43% Dysentery cases  
8% V.D. cases

roughly 1/10 of a Division unnecessarily lost during that week.

3. As regards the anti-malaria campaign, full instructions regarding the steps to be taken will be published very shortly and everybody must then get busy.

4. As regards the fly, work must start at once. We must get the area as clean as we can make it and there is much to be done in this respect. If we can destroy their breeding places and food supplies we shall have half won the battle and much spraying, trapping and swatting in addition to sickness will be saved. The seven steps which we must take are given below; detailed instructions are contained in Hygiene pamphlets and are known by every soldier.

(a) Except where absolutely impracticable deep-trench latrines they must be used with fly-proof covers. If the excreta has reached three feet from the surface they must be filled in. This is essential because flies can breed in excreta or other refuse if it is less than three feet deep.

(b) Tins and other rubbish must also be buried the same depth and whenever practicable they must first be incinerated. The empty tins now lying about the countryside, quite apart from helping the flies, provide ideal breeding places for mosquitoes. There is no objection to swill being disposed of to the inhabitants when practicable as this will help food production, but when this is done, the swill must be kept in covered containers and they must be cleaned daily; if really good arrangements can not be made it is better to incinerate everything.

- (c) We must get rid of the uncovered and unburnt rubbish dumps even when they are some way from a village or farm they are in the area.
- (d) Some kitchen water and urine provide excellent food for flies and no proper sealings and urinals must be under indiscriminate burning near billets and bivouacs must be stopped.
- (e) From now on there must be scrupulous cleanliness in and around latrines, even if they are merely a trench in the open. All food must be protected from flies by being covered up, etc.

6. If traps are not available to clear the countryside of empty tins and for other necessary jobs, civil labour must be employed: the work can be supervised by Field Hygiene sections or local units. The units and villages or farms must take firm measures to improve the very low standard of civil hygiene. When it gets warmer, other things being equal, the further units keep from villages and farms the safer they will be.

7. Some of us are likely to be in this area all the summer and some units will be leaving soon but it is up to all of us to see that any units which follow us do not suffer through our failure to take every practicable measure.

8. The Corps Comd directs that this letter be brought to the notice of all units.

9. REPORT MADE BY THE 1ST BATTALION OF THE 1ST BRIGADE

The following points were noted at the A.M. inspection and Coy Comd was asked to verify these observations.

- (a) Sanitary. It was noticed that you are eating their meals in the streets. If a canteen for mess halls is not available, improvised tables will be set up in billets. Eating meals in the streets is unpleasant for the soldier, and creates an unfavourable impression on the civilians.
- (b) Billets. Beds were found messy. In some cases beds were not made up and in other cases blankets were just pulled up and no effort was made to straighten them. In future blankets will be folded and kit will be laid out in the proper manner.
- (c) Windows. Windows were dirty, and will be washed immediately. Where windows have no glass in them and are patched with canvas, wood, etc. an effort will be made by unit gear to cut a small hole and place glass in them. Every effort will be made to get as much light as possible in offices and billets.
- (d) Leaves and discipline. Leaves of personnel in A.M. is a disgrace. During the A.M. inspection very few were saluted the Bde Comd, in only one or two instances did men sitting on doorsteps or lounging against walls get up and stand to attention when the Bde Comd passed or said "Good morning" to them.
- (e) Coy Comd concerned will ensure that the observations made by the Bde Comd are rectified.

(SIGNED) G. H. G. Coy Comd,  
Adjutant,  
40th Battalion of Canada.

(ii) After the recent operations, considerable unnecessary hardship was caused to next-of-kin by serving personnel sending un-authentic information regarding friends direct to next-of-kin. All personnel MUST realize that it is kinder to send no information than to send incorrect information, and that everything possible will be done by Officer i/c records as soon as reliable information is provided through the proper channels.

(iii) All ranks must appreciate the above, and will, under no circumstances pass on any information regarding casualties.

(B) ALL letters or cables of condolence will be left unsealed and placed in an envelope addressed to Cdn Sec, C.I.C., 3 Echelon, (CICP), who will forward them to the addressee when it has been ascertained that the casualty has been officially reported and that sufficient time has elapsed for notification to reach the next-of-kin.

(C) Individuals writing letters of condolence must take great care to ensure that all particulars of the casualty are given in the letter or cable in order 2 Echelon to make a proper check.

5. LOOTING - AMVs

1. An ever increasing number of instances are occurring of the removal of assemblies and components from unrecovered vehicles.
2. Tks which have been sealed by RMM and left unrecovered, for operational reasons, have been forced open and parts removed. Further, recently two tks collected at HM and sealed down, were broken into and stripped of all their movable kit.
3. As a result of these actions, tks which originally could be repaired in the field have to be evacuated to base workshops where their repair is considerably delayed or even entirely prevented because of missing parts and assemblies.
4. The serious aspect of the incidents quoted above are obviously not understood by all. It must be realized that these actions amount to nothing more or less than sabotage.
5. This order will be explained by officers to All ranks under their command. A warning will be issued that in future punishment for such offences will be exemplary.

6. BATTERIES

Trouble lights of vehicles are NOT to be used for any purpose other than that originally intended unless some means of powering such lights can be found apart from batteries used for running vehicles.

7. MOTORCYCLES

The practice of personnel riding pillion will cease forthwith, disciplinary action will be taken against anyone failing to comply with this order.

8. PAYBOOKS

Patients continue to be admitted to hospital NOT in possession of service paybooks, RMM1, parts 1 & 2. Coy comds will take such steps as may be necessary to ensure that the paybooks are carried at all times and particularly when men are evacuated to hospital. Absence of paybooks for personnel evacuated to hospital makes it impossible for such personnel to be paid and there have been many cases of hardship as a result.

Tr. Instr No. 3  
dated 17 Mar 44.

Background

1. The no time will be spent in walking the course of the Battle of ICHWA under direction of reps from 2 Cdn Inf Bde.

Discussion

2. After walking the course efforts will assemble at Rain Hill where a discussion of the following points will take place:-

(a) The use of the tank in villages

- (i) In general terms is it a good that tanks have a role in village fighting and if so, is it out of us only?
- (ii) Is the present procedure for carrying up the tank and inf necessary in an attack on a town and if necessary, is it satisfactory?
- (iii) What means of communication between tanks and inf are available in village fighting?
- (iv) Do you consider that tanks should fire only at targets selected by inf?

(b) The enemy's tank gun

A special problem arises when attacking villages, because it is impossible beforehand either by ground force or air force to locate enemy tank guns. What preparations and plans, weapons and equipment and employ in village fighting, to neutralize these enemy tank guns?

(c) The role of the tank gun

- (i) Do you consider the tank gun a suitable weapon for village fighting provided:-
- (a) You know the enemy has tanks
- (b) You do not think he has any tanks
- (ii) What are the relative merits of the G-locks, 17-pdrs and special tank guns for use in villages?

(d) Other uses for tanks in villages

In view of the difficulty of moving tank guns up early through enemy fire and the high rate of gun expenditure by both inf and tanks, can you visualize any other uses for tanks in village fighting? If so what and how could they be employed?

(e) Inf sent for village fighting

- (i) What inf equipment do you consider necessary for village fighting?
- (ii) What how much equipment will be carried and employed.

(f) The role of engineers in village fighting

How can the engineers assist the inf and tanks in village fighting?
